REMARKS

At this time we wish to thank our friends and customers for the support they have given us in the past. As costs of growing bulbs have been gradually decreasing, we have passed this saving on to you, and are not now raising our prices, although all signs point to higher prices this spring. We are cutting our description short in this catalog as we believe that most of our customers are familiar with most of the varieties in commerce today. If you do not happen to be familiar with some of them, we are preparing a mimeograph sheet, listed as bulletin No. 6, giving a complete description of the varieties listed.

Thrips are, we believe, ceasing to worry growers and gardeners. We have heard of many cases of growers who had practically all of their flowers ruined two years ago, and who had no trouble at all last year. This was due, in most cases to nothing but disinfecting the bulbs before planting. We strongly urge that all who plant gladiolus, disinfect their bulbs with bichloride of mercury, which is cheap and can be obtained at any drug store, before planting. We will furnish complete directions on application. If you do this, you can be absolutely sure that you have not imported any thrip on your bulbs, and if you do have any thrip later you can not blame your bulb dealer. If by chance you should get an infestation from some outside source, send for bulletin No. 5, which gives complete directions for control.

We wish that we had space to give detailed observations as to the outstanding varieties, but in the space available we are not able to attempt it. We have a bulletin prepared that will give this. If you are interested ask for bulletin No. 1.

We are making a change in listing our bulbs in our retail list. While formerly we listed six sizes of bulbs we now list only three; Large, Medium, and Small. In these new sizes No. 1 and No. 2 are Large, No. 3 and No. 4 are Medium and No. 5 and No. 6 are Small. This simplifies the catalog and we hope that you are pleased with it. In the wholesale section the sizes are as follows:

No. 1 bulbs over 1½" Dia.	No. 4 Bulbs ¾-1 " Dia.
No. 2 bulbs 1¼-1½" Dia.	No. 5 bulbs ½-¾" Dia.
No. 3 bulbs 1 -1¼" Dia.	No. 6 bulbs ¼-½" Dia.

We believe that our list is quite complete, but if you desire varieties that are not listed, tell us and we will do our best to supply them. We have several varieties that are in too small quantities to list.

This will probably be the only list that we will issue this year, unless the prospective code is put into operation before the end of the selling season. So we advise placing your order early, as large bulbs are scarce this season, and will, in all probability, be sold out soon. We have tried hard to make our prices fair, but if for any reason prices do go down, do not be afraid to send us your order—we will add enough extras to more than make up for the drop in price.

TOBERSUN

Our aim and ambition is to treat our customers as we would like to be treated. To this end we treat all of our bulbs before planting and before shipping to assure you that there is no disease or thrips. We carefully rogue our plantings each year to eliminate as far as we can the possibility of mixture.

OUR GUARANTEE. If any bulbs bought from us do not prove satisfactory in every way, we will cheerfully replace them or refund the purchase price.

BULLETINS

Elm Hill Farm maintains a bulletin service for our customers, which includes answering questions not covered in the catalog or the following bulletins:

- No. 1 Outstanding varieties for 1934.
- No. 2 Growing and preparing glads for show.
- No. 3 Hints on growing glads.
- No. 4 Common diseases of glads and their control.
- No. 5 Thrips and their control.
- No. 6 Descriptive list of glads grown by Elm Hill Farm.
- No. 7 Hybridizing by Mrs. A. H. Austin.

Any of these are available free of charge.

READ CAREFULLY BEFORE ORDERING

SHIPMENTS start about March 15th. However, if you want your bulbs before this we will ship them at any time you desire. All retail orders for \$1.00 or more will be prepaid to all points reached by parcel post; on orders less than \$1.00 add 15c for postage. All stock offered and orders accepted subject to prior sale. Orders including bulbs from both wholesale and retail lists will be sent carrying charges collect and plenty of bulbs added to make up for the difference in the retail prices.

SUBSTITUTIONS. If out of the size ordered we will substitute equal value in the next nearest size, unless instructed otherwise. If out of variety ordered we will not substitute without permission. On late orders it would be advisable to give second choice.

EXTRAS. We include some extras on all orders at the retail prices. The larger the order the more extras you receive.

QUANTITIES. On all orders from the retail list we offer 5 bulbs at the 10 rate and 25 bulbs at the 100 rate. 100 rate 8 times 10 rate. No single item of less than 10c.

TERMS. Our terms are cash before shipment. 25% will hold early orders until March 1st. Any order not fully paid will be send C. O. D. for the balance.

ABBREVIATIONS

We have used abbreviations to describe the most of the varieties. The first parenthesis in bold face type refers to the originator as follows: AUS Australian; C, Coleman; Dec, Decorah; D, Deiner; FCH, Hornberger; K, Kunderd; L, Lemoine; M, Mair; Pf Pfitzer; Sal, Salbach.

We have also used abbreviations to describe the type of flower, as follows: Com, Commercial; Ex-Exhibition; Dec, Decorative; N, Needlepoint; M, Miniature.

SPECIALS

We have found that every one likes specials; so we have set aside a limited quantity of bulbs to be used in this manner. These varieties are all leaders in their color classes, and will please even the most discriminating grower of glads. They are priced ridiculously low, and for this reason we can not guarantee to hold these offers open for the entire season.

PICARDY SPECIAL

1 large, 5 medium, 7 small bulbs for.....\$1.00

FLORENCE HUBLER SPECIAL

1 Medium, 3 small bulbs for\$2.00

OHIO STATE SPECIAL

2 large, 3 medium, 5 small bulbs for\$1.00

SALBACH'S ORCHID SPECIAL

1 large, 3 medium, 6 small bulbs for \$1.00

MAGNA BLANCA SPECIAL

2 large, 10 medium, 10 small bulbs for\$1.00

ALL FIVE of these specials for\$5.00

ASSORTMENT

As many people grow glads for pleasure and do not care for named varieties, we offer an assortment of 20 or more of the really good varieties in our list, our selection as to varieties and not labeled for—

\$1.10 per 50 prepaid, \$2.00 per 100 prepaid.

WHOLESALE PRICES
F. O. B. WAYLAND

NOTICE

TO DEALERS AND JOBBERS: The varieties marked (*) in the above list are available in large quantities. They are well cured and suitable either for forcing or for outside planting. Write us for prices on your want list. We can supply small sizes in most of these varieties.

"The bulbs you sent me are the finest that I have ever seen." — Massachusetts.

EVERY GLAD FAN

Should be a member of a gladiolus society. The cost is small and the benefits large. THE OHIO STATE GLADIOLUS SOCIETY invites you to join. The cost is \$2.00 per year and for this you receive the GLADIOLUS REVIEW, the official organ of the American Gladiolus Society, a monthly publication. In addition you get free admittance to all shows of the Ohio State and the American Gladiolus societies. Send your remittance to Lee M. Patton, Secy., Twinsburg, Ohio, or send it to us and we will forward it.

FREE BULBS. If you send us a new membership before May 15, together with an order for bulbs for \$2.00 or more, we will include in your order 5 Large bulbs of Tobersun and 2 Large bulbs of Ohio State as long as the supply lasts.

DISINFECTING

Again we strongly urge everyone to disinfect their bulbs with Bichloride of Mercury before planting. It is very inexpensive and if there are any thrips or disease present, it will effectively control them. If a disinfecting program is pursued by all growers in a given locality for a period of two years we believe that the thrip menace will be largely a thing of the past. So, regardless of whether you grew the bulbs yourself or from a grower, disinfect them thoroughly before planting and get your neighbors to do the same. Most growers now take great pains and go to large expense to keep their bulbs free from this pest. It is their hope that their customers will cooperate with them in eradicating the thrip.

May we thank you again for the cooperation you have given us in the past, and again assert our willingness to help you in any way possible to grow better glads. We also want you to know that visitors are always welcome to Elm Hill Farm. Flower and Garden Clubs are especially welcome. If you live within driving distance we will be glad to make arrangements for your Garden Club to make us a visit.

Sincerely,

ELM HILL FARM

R. C. BELLARD,
